Specialized, Focused & Driven by Results

Boston Hernia is disrupting the traditional healthcare model with personalized attention, better patient outcomes, fewer complications, shorter recovery times and a dramatically lower cost of care.

Founded in 2001 by Dr. Michael Reinhorn, Boston Hernia is a specialty center focused exclusively on the diagnosis, treatment, repair, and recovery of hernias. Over more than 21 years working with hernia sufferers, Dr. Reinhorn recognized that traditional surgical solutions too often result in long recovery times, high levels of acute post-operative pain, and unacceptable rates of long-term pain and disability. He recruited and trained a dedicated team which is successfully using The Boston Hernia Method to virtually eliminate chronic pain for thousands and reduce opioid use to nearly zero.

"I started Boston Hernia because I was dissatisfied with the outcomes my patients were getting with traditional methods. By focusing on this one area, our team makes certain each patient gets the best possible outcome, the highest level of service and experiences the fastest recovery possible."

Dr. Michael Reinhorn

TRADITIONAL METHODS

Hospital Procedure

Performed by General Surgeons

Averaging about 50 Hernia procedures annually

General Anesthesia

Risk of Chronic Pain Caused

by Surgical Technique

Post-Op Chronic Pain 5-15%

Debilitating Long-Lasting Pain 3-6%

5X More Complications

Often Over 3X More Expensive

BOSTON HERNIA

Outpatient Procedure/30-60 Minutes

Performed By Hernia Specialists

Averaging 350-400 Procedures Annually

Avoids General Anesthesia/Faster Recovery

Reduced Risk of Complications

Including Chronic Pain

Personalized Care Teams

Two Providers Per Patient

Patient Tailored Approach

Providing More Procedure Options Than Any Other Facility in the US Including Two Unique Procedures

95% Take No Opioids After Surgery

40% of Patients Miss No Work

Virtually Eliminates Chronic Pain
